EXPERIENCE

- **NAB Innovation Centre Vietnam** June 2025 – Present
Software Engineer
 - **Modernized** a legacy desktop banking system by **architecting a migration** to **Java Spring Boot microservices**.
 - **Replaced** a legacy Delphi binary parser with a **custom Java-based parser** to handle **complex mainframe formats**.
 - **Developed** a robust **ETL pipeline** to **automate the ingestion** of mainframe banking reports.

TECHVIFY April 2023 – April 2025

Software Engineer

- **EduTech Client**
 - **Optimized video processing latency** by implementing an asynchronous flow using **FFmpeg and AWS SQS**, successfully decoupling background jobs from user-facing services.
 - **Built and deployed serverless architectures** with **AWS Lambda and DynamoDB**, ensuring the system could scale automatically.
 - **Streamlined payment and authentication** through **PayOS** integration and robust **JWT/OAuth2** implementation for secure API access control.
- **Singapore Electricity and Gas Distribution Company**
 - **Improved system performance and maintainability** by migrating complex **VBA business logic to Java** for core distribution calculations.
 - Developed and integrated **GraphQL APIs** using Java and Spring to provide flexible and efficient data querying.
 - **Optimized data processing throughput** by building an asynchronous calculation flow to manage long-running background jobs initiated by user file uploads.

EDUCATION

- **Posts and Telecommunications Institute of Technology**
Bachelor of Information Technology

TECHNICAL SKILLS

- **Languages:** Go, Java
- **Frameworks:** Gin, REST APIs, GraphQL, Spring Framework
- **Tools & Platforms:** Docker, PostgreSQL, DynamoDB, AWS (Lambda, S3), Azure Blob Storage
- **Certifications:** TOEIC 860
